France

Dear sirs,

Student in a two year technical degree in international trade, I'm am looking for an internship from May 2nd to the 4th of July.

Curious and autonomous, I have always used these qualities to obtain good results. I chose several options including european class and english literature which helped me improve my english. Therefore, I would like to be in total immersion in an international company.

Communicative, I love to help customers or collaborators and I have no problem talking with them.

Motivated, I wish to integrate a company like yours. I could help you with several missions like : business development or initiating international business setting.. You will find in attached file all the missions that I have to accomplish.

I have always been a traveller. I have been to every countries that have borders with France and more. I expect a lot from this internship and I hope that this will teach me a lot about international relationships.

I would like the opportunity to meet with you and discuss my qualifications in greater details at your convenience.

Thank you for your consideration.
